Completeness Check Report

Public Procurement Agent - 10 Test Cases.docx

Public Procurement Document-Completeness Agent

BSE4104 AI-Native and Agentic Engineering Capstone

Group H (Evening), Makerere University

16 September 2026

1. Introduction

This report records a completeness check of the submission "Public Procurement Agent - 10 Test Cases.docx". The submission was checked against Standard procurement checklist (bundled template), which lists 22 required documents. The check was run on 16 September 2026 using the llama3.1:8b language model.

A completeness check establishes only whether each required document could be located. It does not judge the quality, validity or legal effect of any document, and it does not score, rank or recommend the bid.

Checklist used. This check used the bundled standard checklist, which is a general template. The documents a bid must actually contain are set by the bidding document for this tender. Edit the checklist to match it before relying on these findings.

1.1 How each item was checked

- The model was given the single page of the submission and one checklist item at a time.
- It either quoted the passage it judged to be the document, with a page number, or reported that no passage is the document.
- Any quotation was then searched for in the submission text. A quotation that does not appear word for word is not accepted as evidence.
- An accepted quotation was shown to the model a second time, with the rest of the submission withheld. This evidence check asks whether the passage is the required document or a related one.
- A match with confidence below 0.85 was not reported as Found. It was passed to a person instead.

Table 1 defines the three statuses used in this report. Confidence is the model's own estimate, from 0.00 to 1.00, of how closely a passage matches the requirement. It is not a score of the bid.

Table 1: Meaning of each status

Status	What it means
Found	Text in the submission was accepted as this document. The quotation was confirmed to exist in the submission.
Not Found	No text in the submission was accepted as this document. This is not proof that the document is absent. It may be missing, or present under wording the model did not recognise.
Requires Human Review	The system did not reach a decision. A person must record the item as Found or Not Found.

Table 2 records the settings of this run.

Table 2: Settings of the check

Setting	Value
Submission	Public Procurement Agent - 10 Test Cases.docx
Pages read	1
Checklist	Standard procurement checklist (bundled template)
Required documents	22
Model	llama3.1:8b
Prompt pipeline	v2.0-per-item + adjudicator-v1.0
Evidence check	On
Review threshold	0.85

2. Summary of findings

Of the 22 required documents, 1 was found, 21 were not found, and 0 need a person to decide.

Check the inputs first. Most required documents were not found. Before treating the bid as incomplete, confirm that the correct file was checked, and that the checklist matches the bidding document for this tender.

Table 3 lists every item with its status. Section 3 explains each item in full, including what the system did and why.

Table 3: Status of every required document

Item	Required document	Status	Page	Confidence
STD-01	Bid submission form completed and signed by the authorised signatory	**Not Found**	None	0.00
STD-02	Certificate of incorporation or business registration certificate	**Not Found**	None	0.00
STD-03	Trading licence valid for the current year	**Not Found**	None	0.00
STD-04	Valid tax clearance certificate from the revenue authority	**Not Found**	None	0.00
STD-05	Certificate of non-blacklisting or non-debarment	**Not Found**	None	0.00
STD-06	Power of attorney authorising the signatory of the bid	**Not Found**	None	0.00
STD-07	Registration with the professional or sector regulator governing the works or services	**Not Found**	None	0.00
STD-08	Audited financial statements for the last two financial years	**Not Found**	None	0.00
STD-09	Bid security in the form and amount stated in the bidding document	**Found**	None	0.90
STD-10	Banker's reference or evidence of access to a line of credit	**Not Found**	None	0.00
STD-11	Priced bill of quantities or price schedule	**Not Found**	None	0.00
STD-12	Statement of similar works completed or experience record	**Not Found**	None	0.00
STD-13	Curricula vitae of the proposed key personnel	**Not Found**	None	0.00
STD-14	Schedule of plant and equipment available for the assignment	**Not Found**	None	0.00
STD-15	Work programme or methodology statement	**Not Found**	None	0.00

STD-16	Anti-bribery and anti-corruption declaration signed by the bidder	**Not Found**	None	0.00
STD-17	Signed conflict of interest declaration	**Not Found**	None	0.00
STD-18	Beneficial ownership disclosure form	**Not Found**	None	0.00
STD-19	Signed code of ethical conduct for bidders	**Not Found**	None	0.00
STD-20	Evidence of professional indemnity or third party liability insurance	**Not Found**	None	0.00
STD-21	Certificate of compliance with statutory social security contributions	**Not Found**	None	0.00
STD-22	Statement of litigation history or pending disputes	**Not Found**	None	0.00

3. Item-by-item findings

Each item below states what the submission had to contain, what the system actually did, the evidence it relied on, and what the result means for the procurement officer.

3.1 STD-01: Bid submission form completed and signed by the authorised signatory

What had to be present. The submission had to contain this document: "Bid submission form completed and signed by the authorised signatory". To be reported Found, the model had to quote it from the submission. The quotation had to appear word for word in the submission text. It then had to pass the evidence check, which confirms the quoted passage is this document and not a related one.

What the system did. The model was given the single page of the submission and asked to find this document. It reported that no passage is this document, and returned no page and no quotation. Its match confidence was 0.00. A value of 0.00 means it saw no likely match. With nothing quoted, there was no evidence for the later checks to verify.

Evidence. None. No page number and no quotation were returned.

Result. Not Found, confidence 0.00. No text in the submission was accepted as this document. This is not proof that the document is absent. It may be missing, or present under wording the model did not recognise.

Next step. Search the submission by hand for this document. If it is there, record it as Found with its page number. If it is not, record it as missing.

3.2 STD-02: Certificate of incorporation or business registration certificate

What had to be present. The submission had to contain this document: "Certificate of incorporation or business registration certificate". To be reported Found, the model had to quote it from the submission. The quotation had to appear word for word in the submission text. It then had to pass the evidence check, which confirms the quoted passage is this document and not a related one.

What the system did. The model was given the single page of the submission and asked to find this document. It reported that no passage is this document, and returned no page and no quotation. Its match confidence was 0.00. A value of 0.00 means it saw no likely match. With nothing quoted, there was no evidence for the later checks to verify.

Evidence. None. No page number and no quotation were returned.

Result. Not Found, confidence 0.00. No text in the submission was accepted as this document. This is not proof that the document is absent. It may be missing, or present under wording the model did not recognise.

Next step. Search the submission by hand for this document. If it is there, record it as Found with its page number. If it is not, record it as missing.

3.3 STD-03: Trading licence valid for the current year

What had to be present. The submission had to contain this document: "Trading licence valid for the current year". To be reported Found, the model had to quote it from the submission. The quotation had to appear word for word in the submission text. It then had to pass the evidence check, which confirms the quoted passage is this document and not a related one.

What the system did. The model was given the single page of the submission and asked to find this document. It reported that no passage is this document, and returned no page and no quotation. Its match confidence was 0.00. A value of 0.00 means it saw no likely match. With nothing quoted, there was no evidence for the later checks to verify.

Evidence. None. No page number and no quotation were returned.

Result. Not Found, confidence 0.00. No text in the submission was accepted as this document. This is not proof that the document is absent. It may be missing, or present under wording the model did not recognise.

Next step. Search the submission by hand for this document. If it is there, record it as Found with its page number. If it is not, record it as missing.

3.4 STD-04: Valid tax clearance certificate from the revenue authority

What had to be present. The submission had to contain this document: "Valid tax clearance certificate from the revenue authority". To be reported Found, the model had to quote it from the submission. The quotation had to appear word for word in the submission text. It then had to pass the evidence check, which confirms the quoted passage is this document and not a related one.

What the system did. The model was given the single page of the submission and asked to find this document. It reported that no passage is this document, and returned no page and no quotation. Its match confidence was 0.00. A value of 0.00 means it saw no likely match. With nothing quoted, there was no evidence for the later checks to verify.

Evidence. None. No page number and no quotation were returned.

Result. Not Found, confidence 0.00. No text in the submission was accepted as this document. This is not proof that the document is absent. It may be missing, or present under wording the model did not recognise.

Next step. Search the submission by hand for this document. If it is there, record it as Found with its page number. If it is not, record it as missing.

3.5 STD-05: Certificate of non-blacklisting or non-debarment

What had to be present. The submission had to contain this document: "Certificate of non-blacklisting or non-debarment". To be reported Found, the model had to quote it from the submission. The quotation had to appear word for word in the submission text. It then had to pass the evidence check, which confirms the quoted passage is this document and not a related one.

What the system did. The model was given the single page of the submission and asked to find this document. It reported that no passage is this document, and returned no page and no quotation. Its match confidence was 0.00. A value of 0.00 means it saw no likely match. With nothing quoted, there was no evidence for the later checks to verify.

Evidence. None. No page number and no quotation were returned.

Result. Not Found, confidence 0.00. No text in the submission was accepted as this document. This is not proof that the document is absent. It may be missing, or present under wording the model did not recognise.

Next step. Search the submission by hand for this document. If it is there, record it as Found with its page number. If it is not, record it as missing.

3.6 STD-06: Power of attorney authorising the signatory of the bid

What had to be present. The submission had to contain this document: "Power of attorney authorising the signatory of the bid". To be reported Found, the model had to quote it from the submission. The quotation had to appear word for word in the submission text. It then had to pass the evidence check, which confirms the quoted passage is this document and not a related one.

What the system did. The model was given the single page of the submission and asked to find this document. It reported that no passage is this document, and returned no page and no quotation. Its match confidence was 0.00. A value of 0.00 means it saw no likely match. With nothing quoted, there was no evidence for the later checks to verify.

Evidence. None. No page number and no quotation were returned.

Result. Not Found, confidence 0.00. No text in the submission was accepted as this document. This is not proof that the document is absent. It may be missing, or present under wording the model did not recognise.

Next step. Search the submission by hand for this document. If it is there, record it as Found with its page number. If it is not, record it as missing.

3.7 STD-07: Registration with the professional or sector regulator governing the works or services

What had to be present. The submission had to contain this document: "Registration with the professional or sector regulator governing the works or services". To be reported Found, the model had to quote it from the submission. The quotation had to appear word for word in the submission text. It then had to pass the evidence check, which confirms the quoted passage is this document and not a related one.

What the system did. The model was given the single page of the submission and asked to find this document. It reported that no passage is this document, and returned no page and no quotation. Its match confidence was 0.00. A value of 0.00 means it saw no likely match. With nothing quoted, there was no evidence for the later checks to verify.

Evidence. None. No page number and no quotation were returned.

Result. Not Found, confidence 0.00. No text in the submission was accepted as this document. This is not proof that the document is absent. It may be missing, or present under wording the model did not recognise.

Next step. Search the submission by hand for this document. If it is there, record it as Found with its page number. If it is not, record it as missing.

3.8 STD-08: Audited financial statements for the last two financial years

What had to be present. The submission had to contain this document: "Audited financial statements for the last two financial years". To be reported Found, the model had to quote it from the submission. The quotation had to appear word for word in the submission text. It then had to pass the evidence check, which confirms the quoted passage is this document and not a related one.

What the system did. The model was given the single page of the submission and asked to find this document. It reported that no passage is this document, and returned no page and no quotation. Its match confidence was 0.00. A value of 0.00 means it saw

no likely match. With nothing quoted, there was no evidence for the later checks to verify.

Evidence. None. No page number and no quotation were returned.

Result. Not Found, confidence 0.00. No text in the submission was accepted as this document. This is not proof that the document is absent. It may be missing, or present under wording the model did not recognise.

Next step. Search the submission by hand for this document. If it is there, record it as Found with its page number. If it is not, record it as missing.

3.9 STD-09: Bid security in the form and amount stated in the bidding document

What had to be present. The submission had to contain this document: "Bid security in the form and amount stated in the bidding document". To be reported Found, the model had to quote it from the submission. The quotation had to appear word for word in the submission text. It then had to pass the evidence check, which confirms the quoted passage is this document and not a related one.

What the system did. The model was given the single page of the submission and located the document in the submission. The file format has no page boundaries, so no page was given. The quotation was confirmed to appear in the submission. The evidence check then compared the quotation with the requirement. It described the quoted passage as "Bid security" and the requirement as "Bid security". It judged them to be the same document. Final confidence was 0.90, at or above the 0.85 review threshold.

Evidence. No page number, as the file format has no pages: "Section 7 - Bid Security The bidder has attached the required bid security issued by ABC Bank."

Result. Found, confidence 0.90. Text in the submission was accepted as this document. The quotation was confirmed to exist in the submission.

Next step. Find the quoted passage in the submission and confirm it is the required document.

3.10 STD-10: Banker's reference or evidence of access to a line of credit

What had to be present. The submission had to contain this document: "Banker's reference or evidence of access to a line of credit". To be reported Found, the model had to quote it from the submission. The quotation had to appear word for word in the submission text. It then had to pass the evidence check, which confirms the quoted passage is this document and not a related one.

What the system did. The model was given the single page of the submission and

asked to find this document. It reported that no passage is this document, and returned no page and no quotation. Its match confidence was 0.00. A value of 0.00 means it saw no likely match. With nothing quoted, there was no evidence for the later checks to verify.

Evidence. None. No page number and no quotation were returned.

Result. Not Found, confidence 0.00. No text in the submission was accepted as this document. This is not proof that the document is absent. It may be missing, or present under wording the model did not recognise.

Next step. Search the submission by hand for this document. If it is there, record it as Found with its page number. If it is not, record it as missing.

3.11 STD-11: Priced bill of quantities or price schedule

What had to be present. The submission had to contain this document: "Priced bill of quantities or price schedule". To be reported Found, the model had to quote it from the submission. The quotation had to appear word for word in the submission text. It then had to pass the evidence check, which confirms the quoted passage is this document and not a related one.

What the system did. The model was given the single page of the submission and asked to find this document. It reported that no passage is this document, and returned no page and no quotation. Its match confidence was 0.00. A value of 0.00 means it saw no likely match. With nothing quoted, there was no evidence for the later checks to verify.

Evidence. None. No page number and no quotation were returned.

Result. Not Found, confidence 0.00. No text in the submission was accepted as this document. This is not proof that the document is absent. It may be missing, or present under wording the model did not recognise.

Next step. Search the submission by hand for this document. If it is there, record it as Found with its page number. If it is not, record it as missing.

3.12 STD-12: Statement of similar works completed or experience record

What had to be present. The submission had to contain this document: "Statement of similar works completed or experience record". To be reported Found, the model had to quote it from the submission. The quotation had to appear word for word in the submission text. It then had to pass the evidence check, which confirms the quoted passage is this document and not a related one.

What the system did. The model was given the single page of the submission and asked to find this document. It reported that no passage is this document, and returned no page and no quotation. Its match confidence was 0.00. A value of 0.00 means it saw no likely match. With nothing quoted, there was no evidence for the later checks to verify.

Evidence. None. No page number and no quotation were returned.

Result. Not Found, confidence 0.00. No text in the submission was accepted as this document. This is not proof that the document is absent. It may be missing, or present under wording the model did not recognise.

Next step. Search the submission by hand for this document. If it is there, record it as Found with its page number. If it is not, record it as missing.

3.13 STD-13: Curricula vitae of the proposed key personnel

What had to be present. The submission had to contain this document: "Curricula vitae of the proposed key personnel". To be reported Found, the model had to quote it from the submission. The quotation had to appear word for word in the submission text. It then had to pass the evidence check, which confirms the quoted passage is this document and not a related one.

What the system did. The model was given the single page of the submission and asked to find this document. It reported that no passage is this document, and returned no page and no quotation. Its match confidence was 0.00. A value of 0.00 means it saw no likely match. With nothing quoted, there was no evidence for the later checks to verify.

Evidence. None. No page number and no quotation were returned.

Result. Not Found, confidence 0.00. No text in the submission was accepted as this document. This is not proof that the document is absent. It may be missing, or present under wording the model did not recognise.

Next step. Search the submission by hand for this document. If it is there, record it as Found with its page number. If it is not, record it as missing.

3.14 STD-14: Schedule of plant and equipment available for the assignment

What had to be present. The submission had to contain this document: "Schedule of plant and equipment available for the assignment". To be reported Found, the model had to quote it from the submission. The quotation had to appear word for word in the submission text. It then had to pass the evidence check, which confirms the quoted

passage is this document and not a related one.

What the system did. The model was given the single page of the submission and asked to find this document. It reported that no passage is this document, and returned no page and no quotation. Its match confidence was 0.00. A value of 0.00 means it saw no likely match. With nothing quoted, there was no evidence for the later checks to verify.

Evidence. None. No page number and no quotation were returned.

Result. Not Found, confidence 0.00. No text in the submission was accepted as this document. This is not proof that the document is absent. It may be missing, or present under wording the model did not recognise.

Next step. Search the submission by hand for this document. If it is there, record it as Found with its page number. If it is not, record it as missing.

3.15 STD-15: Work programme or methodology statement

What had to be present. The submission had to contain this document: "Work programme or methodology statement". To be reported Found, the model had to quote it from the submission. The quotation had to appear word for word in the submission text. It then had to pass the evidence check, which confirms the quoted passage is this document and not a related one.

What the system did. The model was given the single page of the submission and asked to find this document. It reported that no passage is this document, and returned no page and no quotation. Its match confidence was 0.00. A value of 0.00 means it saw no likely match. With nothing quoted, there was no evidence for the later checks to verify.

Evidence. None. No page number and no quotation were returned.

Result. Not Found, confidence 0.00. No text in the submission was accepted as this document. This is not proof that the document is absent. It may be missing, or present under wording the model did not recognise.

Next step. Search the submission by hand for this document. If it is there, record it as Found with its page number. If it is not, record it as missing.

3.16 STD-16: Anti-bribery and anti-corruption declaration signed by the bidder

What had to be present. The submission had to contain this document: "Anti-bribery and anti-corruption declaration signed by the bidder". To be reported Found, the model had to quote it from the submission. The quotation had to appear word for word in the

submission text. It then had to pass the evidence check, which confirms the quoted passage is this document and not a related one.

What the system did. The model was given the single page of the submission and asked to find this document. It reported that no passage is this document, and returned no page and no quotation. Its match confidence was 0.00. A value of 0.00 means it saw no likely match. With nothing quoted, there was no evidence for the later checks to verify.

Evidence. None. No page number and no quotation were returned.

Result. Not Found, confidence 0.00. No text in the submission was accepted as this document. This is not proof that the document is absent. It may be missing, or present under wording the model did not recognise.

Next step. Search the submission by hand for this document. If it is there, record it as Found with its page number. If it is not, record it as missing.

3.17 STD-17: Signed conflict of interest declaration

What had to be present. The submission had to contain this document: "Signed conflict of interest declaration". To be reported Found, the model had to quote it from the submission. The quotation had to appear word for word in the submission text. It then had to pass the evidence check, which confirms the quoted passage is this document and not a related one.

What the system did. The model was given the single page of the submission and asked to find this document. It reported that no passage is this document, and returned no page and no quotation. Its match confidence was 0.00. A value of 0.00 means it saw no likely match. With nothing quoted, there was no evidence for the later checks to verify.

Evidence. None. No page number and no quotation were returned.

Result. Not Found, confidence 0.00. No text in the submission was accepted as this document. This is not proof that the document is absent. It may be missing, or present under wording the model did not recognise.

Next step. Search the submission by hand for this document. If it is there, record it as Found with its page number. If it is not, record it as missing.

3.18 STD-18: Beneficial ownership disclosure form

What had to be present. The submission had to contain this document: "Beneficial ownership disclosure form". To be reported Found, the model had to quote it from the submission. The quotation had to appear word for word in the submission text. It then

had to pass the evidence check, which confirms the quoted passage is this document and not a related one.

What the system did. The model was given the single page of the submission and asked to find this document. It reported that no passage is this document, and returned no page and no quotation. Its match confidence was 0.00. A value of 0.00 means it saw no likely match. With nothing quoted, there was no evidence for the later checks to verify.

Evidence. None. No page number and no quotation were returned.

Result. Not Found, confidence 0.00. No text in the submission was accepted as this document. This is not proof that the document is absent. It may be missing, or present under wording the model did not recognise.

Next step. Search the submission by hand for this document. If it is there, record it as Found with its page number. If it is not, record it as missing.

3.19 STD-19: Signed code of ethical conduct for bidders

What had to be present. The submission had to contain this document: "Signed code of ethical conduct for bidders". To be reported Found, the model had to quote it from the submission. The quotation had to appear word for word in the submission text. It then had to pass the evidence check, which confirms the quoted passage is this document and not a related one.

What the system did. The model was given the single page of the submission and asked to find this document. It reported that no passage is this document, and returned no page and no quotation. Its match confidence was 0.00. A value of 0.00 means it saw no likely match. With nothing quoted, there was no evidence for the later checks to verify.

Evidence. None. No page number and no quotation were returned.

Result. Not Found, confidence 0.00. No text in the submission was accepted as this document. This is not proof that the document is absent. It may be missing, or present under wording the model did not recognise.

Next step. Search the submission by hand for this document. If it is there, record it as Found with its page number. If it is not, record it as missing.

3.20 STD-20: Evidence of professional indemnity or third party liability insurance

What had to be present. The submission had to contain this document: "Evidence of professional indemnity or third party liability insurance". To be reported Found, the

model had to quote it from the submission. The quotation had to appear word for word in the submission text. It then had to pass the evidence check, which confirms the quoted passage is this document and not a related one.

What the system did. The model was given the single page of the submission and asked to find this document. It reported that no passage is this document, and returned no page and no quotation. Its match confidence was 0.00. A value of 0.00 means it saw no likely match. With nothing quoted, there was no evidence for the later checks to verify.

Evidence. None. No page number and no quotation were returned.

Result. Not Found, confidence 0.00. No text in the submission was accepted as this document. This is not proof that the document is absent. It may be missing, or present under wording the model did not recognise.

Next step. Search the submission by hand for this document. If it is there, record it as Found with its page number. If it is not, record it as missing.

3.21 STD-21: Certificate of compliance with statutory social security contributions

What had to be present. The submission had to contain this document: "Certificate of compliance with statutory social security contributions". To be reported Found, the model had to quote it from the submission. The quotation had to appear word for word in the submission text. It then had to pass the evidence check, which confirms the quoted passage is this document and not a related one.

What the system did. The model was given the single page of the submission and asked to find this document. It reported that no passage is this document, and returned no page and no quotation. Its match confidence was 0.00. A value of 0.00 means it saw no likely match. With nothing quoted, there was no evidence for the later checks to verify.

Evidence. None. No page number and no quotation were returned.

Result. Not Found, confidence 0.00. No text in the submission was accepted as this document. This is not proof that the document is absent. It may be missing, or present under wording the model did not recognise.

Next step. Search the submission by hand for this document. If it is there, record it as Found with its page number. If it is not, record it as missing.

3.22 STD-22: Statement of litigation history or pending disputes

What had to be present. The submission had to contain this document: "Statement of

litigation history or pending disputes". To be reported Found, the model had to quote it from the submission. The quotation had to appear word for word in the submission text. It then had to pass the evidence check, which confirms the quoted passage is this document and not a related one.

What the system did. The model was given the single page of the submission and asked to find this document. It reported that no passage is this document, and returned no page and no quotation. Its match confidence was 0.00. A value of 0.00 means it saw no likely match. With nothing quoted, there was no evidence for the later checks to verify.

Evidence. None. No page number and no quotation were returned.

Result. Not Found, confidence 0.00. No text in the submission was accepted as this document. This is not proof that the document is absent. It may be missing, or present under wording the model did not recognise.

Next step. Search the submission by hand for this document. If it is there, record it as Found with its page number. If it is not, record it as missing.

4. Actions for the procurement officer

The actions below follow from the findings. Section 3 gives the page to start from where one is known.

- Search the submission by hand for each item not found, and confirm whether it is truly absent: STD-01, STD-02, STD-03, STD-04, STD-05, STD-06, STD-07, STD-08, STD-10, STD-11, STD-12, STD-13, STD-14, STD-15, STD-16, STD-17, STD-18, STD-19, STD-20, STD-21, STD-22.
- Spot-check the items found against the quoted pages: STD-09.

5. Scope of this report

This report is a document completeness check only. It records whether required checklist items could be located in the submission. It does not constitute a legal review, an eligibility determination, a score, a ranking, or a recommendation to award or reject any bid. All procurement decisions remain with authorised human officers.
